

TOWNE LAKE COMMUNITY ASSOCIATION, INC.
INSPECTION DECAL PLACEMENT

Upon completion of the inspection process, two vinyl decals will be issued. The purpose of this specific placement is to insure the decals viewable even when a full cover is placed over the boat. This will also insure the decals are in a consistent location regardless of the type of vessel (ski, pontoon, fishing, etc).

Place the decal on the same horizontal line as the state registration numbers. Place the decal between 12 to 18 inches to the stern of the vessel from the validation decal. The graphic below shows the optimum placement. In the absence of any state registration decals, estimate where they would be and place the Towne Lake decal accordingly.
